AT PROFILE ORTHODONTICS WE HAVE ALWAYS BEEN AT THE FOREFRONT OF WORLD'S BEST PRACTICE AND EMBRACING NEW TECHNOLOGY WHEN WE CAN SEE A VALUABLE BENEFIT FOR OUR PATIENTS.

In keeping with this philosophy we are proud to have been the first practice in WA and one of the first practices Australia wide to offer Suresmile technology to our patients.

Simply put – this advanced technology uses sophisticated 3D scanning, state of the art digital modelling and high tech robotics to provide a powerful diagnostic and precision treatment tool. When this precise information is combined with our specialist orthodontist's knowledge and experience it is possible in many cases to reduce the treatment time.

YOU'VE PROBABLY HEARD FROM FRIENDS OR FAMILY THAT WEARING BRACES IS A LONG-TERM COMMITMENT, TAKING MORE THAN 18 - 24 MONTHS ON AVERAGE.

GETTING BRACES ISN'T WHAT IT USED TO BE. YOU'LL GET OUTSTANDING RESULTS, GENERALLY IN LESS TIME WITH PROFILE ORTHODONTICS AND SURESMILE TECHNOLOGY.

PROFILE ORTHODONTICS - SURESMILE TREATMENT

Step one: Advanced Imaging Technology

Profile Orthodontics SureSmile creates a 3-D computer model of your teeth and bite using the handheld Trios Scanner. The scan procedure is the beginning of your SureSmile treatment.

Step two: Prescriptive Planning

With the 3-D model, your orthodontist can now see your teeth from any angle and how they fit together. Profile Orthodontics SureSmile Treatment Planning software provides virtual simulation tools that allow your orthodontist to determine the final position of your teeth and the optimal plan for your unique treatment needs.

Step three: Robotic Accuracy

Once your treatment plan is determined, Profile Orthodontics SureSmile directs a robot to bend a shape memory alloy archwire according to your orthodontist's prescription. This wire is designed to deliver gentle forces needed to move your teeth consistently and directly to their desired finishing position.

BENEFITS

Studies show that the first thing a person notices about you is your smile. A beautiful smile can help improve self-esteem and confidence with the comfort that comes from knowing you don't have to hide your smile.

We work with you to achieve wonderful results that will benefit you for life.

Healthy teeth and gums and a great smile aren't the only benefits of Profile Orthodontics SureSmile treatment. Other benefits include:

- Improved facial aesthetics, jaw function and tooth stability
- Improved function of your bite, helping prevent long-term damage to your teeth and jaw
- Reduced risk of TMJ (temporomandibular joint) disorders
- Properly positioned smile line, where the lower edge of the upper teeth and lower lip meet

We are all aware of the long term benefits of specialised orthodontic treatment for certain patients and we are also very aware of addressing the needs of our patients during treatment.

Profile Orthodontics SureSmile treatment will generally result in fewer practice visits and less time in braces

FAQs

Is my orthodontist in control of my treatment?

Absolutely. In fact, Profile Orthodontics SureSmile technology provides your orthodontist greater control over your treatment than traditional braces.

What is special about Profile Orthodontics SureSmile archwires?

A SureSmile archwire is customized for your unique treatment plan by applying high temperatures and robotic precision to a wire made from shape memory alloy. Once the SureSmile “smart” wire is inserted into your brackets, the shape memory alloy is activated by your body heat and “remembers” its design to move your teeth according to the treatment plan embedded in the bends of the wire. The material characteristics of shape memory alloy deliver gentle, constant forces as they move your teeth to their target positions.

Is there a risk of damaging my teeth because they are moving faster?

SureSmile wires do not move teeth any faster than the same wires used in conventional orthodontics. Your overall treatment time is shorter because Profile Orthodontics SureSmile moves your teeth more directly to their target positions.

AFTER YOUR SURESMILE
WIRE IS INSERTED, YOU'LL
BE ON YOUR WAY TO
A BEAUTIFUL, HEALTHY
SMILE SOONER THAN YOU
THOUGHT POSSIBLE.
